

# Telco: Inangahua Junction to Reefton

**Distance:** 36km

**Location:** Reefton

## Scope:

This project entailed the installation of:

- 36km of 32mm duct
- 11 x bridges, cattle crossing and major culverts crossed
- 5 x pits
- 12 x Rural access tubs

## Achievements:

- Construction over the winter months on the west coast of the South Island
- It was a remote work area which was based several hours drive from the nearest town – Christchurch or Nelson. Onsite communication was difficult due to no cell phone coverage for more than half the project distance.
- Managing multiple sites simultaneously
- Tight timeframes
- Logistics – delivery of material and equipment was tricky due to the remote location
